Sometimes, frost is good, all year round, like it is for this beautiful cultivar. Unique in all the right ways, you will want Apricot frost no matter the time of year. Delectably sweet notes of Kush grace your senses upon opening your newest head stash.

The nugs are extraordinarily dense with heavy trichome production and hints of blues and purples. Created by merging the Gary Payton and Snowman Phenotypes, this strain is certain to surprise and delight even the most discerning connoisseur. A delicate floral bouquet graces the tip of your tongue followed by sweet apricot and rounded out by pepper and musk flavours. Hand watered, hand trimmed and grown indoors, all our plants get the love and care they deserve. Partake, your way, with Apricot Frost.
