If a Unicorn could poop, this is what it would smell like. Pure magic, delight, and bliss is exactly what you can expect from Unicorn Poop. Graced with long nug structures, great trichome production, hints of purples and reds, this cultivar busts up into the perfect consistency for rolling blunts and joints alike. Herbaceous notes of honey, cheese and earth pour out of the package the moment you open it. Combining Sophisticated Lady and GMO genetics produced this otherworldly phenotype.

Hand watered, hand trimmed and grown indoors, all our plants get the love and care they deserve. Partake, your way, with Unicorn Poop.
